MVP in 30 days. Complex solutions in 90 days. Building on PrismX provides higher level of Quality assurance.

### Operate, Scale, Continuous Improvement

24x7 support. Scale operations, scale across sector. Enhancements.

# PrismX Platform

## AI and Application Development Automation

A novel model driven architecture to capture requirements and generate the application

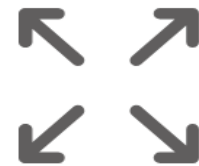

- ⊙ **System Assisted Requirements Capture**
- ⊙ **System Assisted Solution Design**
- ⊙ **System Assisted Process Modeling**
- ⊙ **AI Solutions and Services**
- ⊙ **Auto Generation of end-to-end Working Application**

# Enterprise Ready Platform

## AI Solutions

Broad range of data analysis and natural language processing technologies and solutions.

## Flexibility

Constant flexibility enabling continuous adaptability to business and environmental changes.

## Speed

90 Days to Operations for most solutions. Incremental changes thereafter in near real time.

## Scalability

PrismX is vertically and horizontally scalable. Rapid deployment of extensions and new modules.

## Mobile Ready

All PrismX solutions delivered as Web, iOS and Android applications.

## Information Security

Highly secure applications with 3rd party certification.

**"The team achieved remarkable results with far reaching implications. Their platform has also greatly enhanced the DHE's ability to ensure compliant operation of the Optional Retirement Plan."**

-Director of Retirement Plans at the Department of Higher Education (DHE),  
Commonwealth of Massachusetts

**"We loved our experience working with PrismX. They are more than software developers, they are thought partners and helped make our product even better than we imagined it. We can't imagine where we would be without them!"**

-Chief Product Officer,  
BrightUp (Financial Wellness for the Underserved)

# Client Case Study

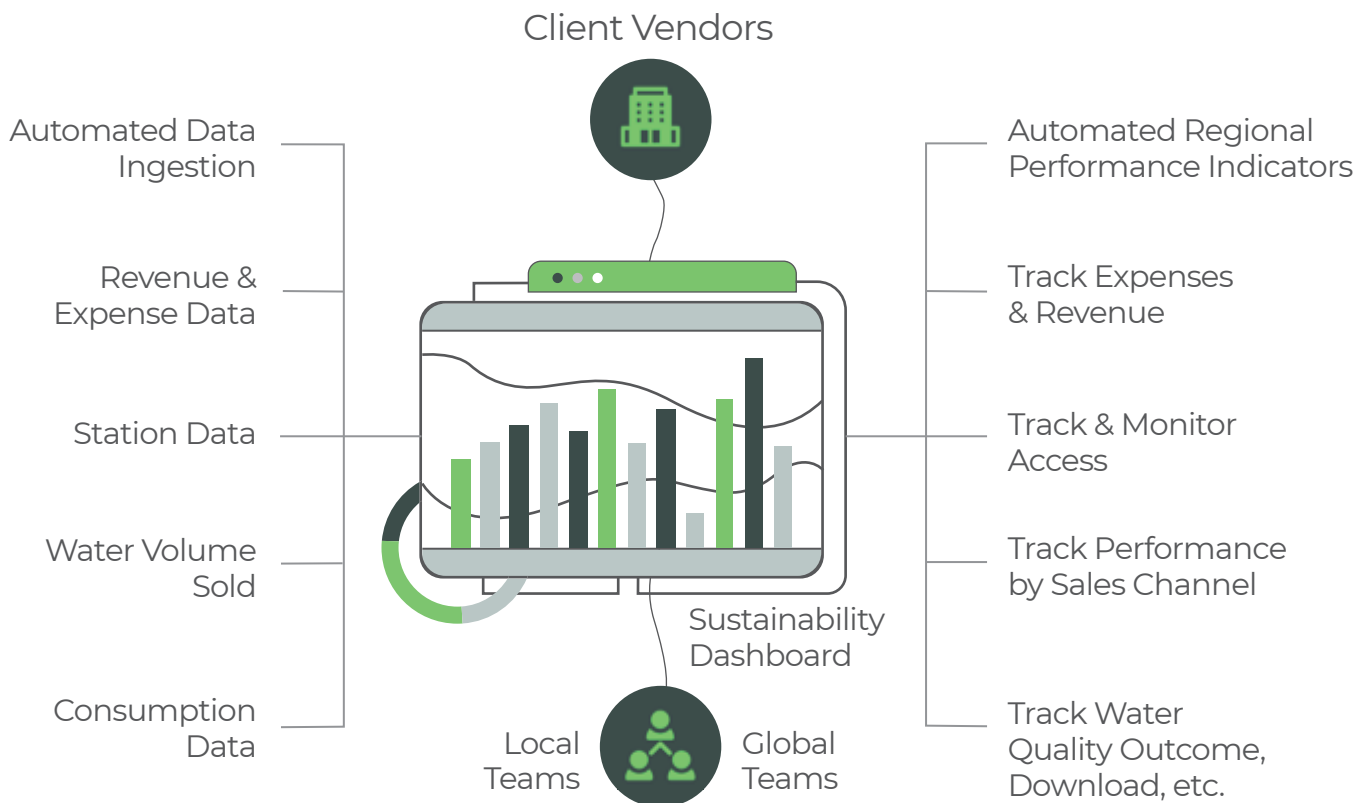

## Overcoming Obstacles to Sustainability and Scale for Off-Grid Systems

### Client Goals

Develop first in the sector end-to-end platform for small water enterprises to improve reach, quality, operational efficiency, community engagement and financial sustainability.

Service offerings for the entire Small Water sector on the client's platform.

### Targeted Outcomes

1. Automation of client's operations from Water Delivery, Finance & Admin to Marketing and Sales.
2. Real-time interfaces with vendors providing metering at water stations or home-delivery systems.
3. Enterprise dashboard to track all critical client and water sector KPIs, from volume, consumption, payment quality to enterprise (at region and country level) performance management.
